

Welcome to AIO

Pioneering Defense Software Solutions and
protecting what matters with technology.

What do we do?

We are at the forefront of harnessing artificial intelligence to redefine the landscape of national defense intelligence. Our cutting-edge solutions empower decision-makers with actionable insights derived from complex data sets. We deliver tailored AI solutions that enhance operational efficiency, bolster security, and accelerate mission success for defense agencies.

Our Products

1. HYDRA

An AI-driven platform that scans the internet every minute, extracting critical data to present global events on an interactive map. Designed for unparalleled situational awareness.

Potential Users: Defense agencies, emergency response organizations, intelligence units, news/media and international organizations.

2. CIVET.AI

Surveillance software for high-speed, high-accuracy object and facial recognition, integrating with GIS/geospatial platforms.

Potential Users: Airports, law enforcement, and border security.

Our Products

3. DATACAMP

Intelligence management software for automating the intelligence cycle and harmonizing reports from diverse organizations. Features AI-driven classification, metadata extraction, and advanced role-based modules.

Potential Users: Military, police forces, security agencies, and NGOs.

4. WATCHTOWER

A graph data explorer for big data investigations, linking entities, events, and associations. Optimized for link analysis and Call Detail Record (CDR) analysis.

Potential Users: Law enforcement, financial crime units, and intelligence analysts.

Our Products

5. OneSearch

A document management system for sensitive or classified information, featuring advanced encryption and offline functionality.

Potential Users: Government departments, defense agencies, and corporate executives.

6. GEO AI TOOLS

Tailored Artificial Intelligence and Machine Learning software solutions, including super-resolution satellite imagery, GIS mapping tools, and secure data analytics platforms.

Potential Users: Defense / Space Agencies, environmental organizations, and urban planners.

INDUSTRIES AND ORGANIZATIONS SERVED

- Defense and Intelligence
- Private Sector: Financial institutions, news/media companies, technology companies, and logistics firms.
- Government: Ministries, state-level agencies, and parastatals.
- International Bodies: NGOs, United Nations affiliates, and humanitarian organizations.

OVERALL CAPABILITIES

- **AI/ML Expertise:** Pioneering solutions in artificial intelligence and machine learning for defense and security.
- **Geospatial Intelligence:** Advanced capabilities in satellite imagery processing and georeferencing.
- **Data Fusion and Analysis:** Comprehensive tools for harmonizing and analyzing multi-source intelligence data.
- **Cybersecurity:** Secure solutions, including vulnerability assessment and network orchestration.
- **Business Process Automation:** Automating business processes, intelligence cycles and operational workflows.
- **Consultancy and Training:** Providing guidance and education to empower organizations.
- **Custom Software Development:** Expertise in designing and developing bespoke software solutions across industries, from healthcare and education to finance and logistics amongst others.

AT AIQ

We use our creativity and
expertise to create products that deliver wonderful results.
